PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER

IBS Consulting, Vancouver, British Columbia | September 2023– present

- I built a website and platform for a Career and Education Consulting firm. I integrated a payment service (Moneris) and a CRM service (Begin CRM) as well as an email campaign service with mailchimp.

FRONTEND DEVELOPER

Traders tools, Vancouver, British Columbia | September 2023– present

- Working on creating an application that allows users to use the different tools to assist their trading experience.

FRONTEND DEVELOPER

Traders Central, Vancouver, British Columbia | August 2021– March 2023

- Chaired the creation of web products and websites for our users, site maintenance and refactoring of previous code with Next.js, Express.js, MongoDB, AWS Amplify, React.js, JavaScript, jQuery, and Bootstrap.
- Specialize in converting Figma designs into HTML and CSS code and creating graphics with SVG.
- Collaborated with designers, engineers and product managers in crafting a web product with a best-in-class user experience.
- Successfully launched 4 platforms for the company - liquidity portal, fund portal, the main website and the marketplace.

CO-FOUNDER & MOBILE DEVELOPER

SendFunds App | August 2020 – Present

- Built the mobile application using React Native and Javascript framework.
- Synergised with other co-founders in growing the MVP, defining specifications, and bringing that product to life.
- Performed legal duties as well as acquired certifications and registration documents.
- Served as a member of the partnerships development team in researching, finding, and recruiting new business relationships and working to identify potential ways to get funded.
- Managed the recruiting, onboarding and management of employees.

FULL-STACK DEVELOPER & COMPUTER ENGINEER

University of Calabar Teaching Hospital, Calabar | July 2020 – August 2021

- Spearheaded the development and maintenance of the hospital's website. I created the website to provide information on all the medical professionals and the services provided at the hospital.
- Worked with business partners, staff, and other groups to identify technical and functional needs of the system, determine the priority of work, and ensure an integrated end-to-end design and delivery.

- Team management
- Strategy development
- Critical thinking

- Created the backend with Django, the python framework, while the frontend was built with HTML and CSS with bootstrap modules.
- Used pipe and filter model to find bottlenecks and measure system resource usage and process behaviour.

FULL-STACK DEVELOPER

This.is.áfrikán, Toronto | November 2020 - July 2021

- Designed, built and built multiple iterations of their already launched e-commerce website using Javascript, SCSS and HTML. frameworks: ReactJS, ExpressJS, Greensock and NodeJS.
- Managed the end-to-end life cycle for the website and oversaw automated testing and feedback.
- Mentored junior developers on the team in Java, JavaScript, and Web Application Development and played a supervisory role in ensuring the successful deployment of planned features.

CHIEF TECHNOLOGY OFFICER

AmpleeFi, San Fransisco | August 2019 - April 2020

- Supervisory and functional team lead of Front-end operations, Brand design, UI/UX design and Mobile application development.
- Yielded the company's strategy for using technological resources and ensured these resources were used efficiently, profitably and securely.
- Brought the site up from concept to MVP within 6 months.

INFORMATION TECHNOLOGY INTERN

Benue State University, Benue | January 2019 - October 2019

- Provided technical support for the network, including router, firewall, and wireless access point.
- Designed, developed, and modified data infrastructure to accelerate the processes of data analysis and reporting.
- Pioneered the data entry and manipulation function
- Compiled, verified the accuracy and sorted information according to priorities to prepare source data for computer entry.

SOFTWARE INTERN

Crackle Nigeria LTD, Abuja | March 2017 - August 2017

- Collaborated proactively with senior leaders to learn about new technologies.
- Researched, investigated and fixed a wide range of technical issues.
- Debugged and tested code and also developed applications.
